Enthusiastic web developer who has a dab hand at both front-end and back-end development. I am passionate about web standards and developing user-friendly websites & web applications. I am always eager to contribute my skills to a dynamic team, collaborate on exciting projects, and contribute to the creation of innovative digital solutions.

Skills

JavaScript (Es6+) • TypeScript • React.js • Next.js • Node.js • Express.js • MongoDB

Professional Experience

01/2023 – present

Frontend Developer, Shopdoora

- Collaborated with cross-functional teams, including designers, testers, and backend developers, to deliver high-quality features on tight timelines.
- Developed and maintained micro-frontends using React, Next and state management libraries like Redux and Zustand.
- Implemented responsive design strategies and mobile-first development approach to ensure seamless user experiences across all devices.
- Worked alongside with five front-end developers for developing eCommerce service platforms for variety of seller, retailer, and vendor.
- Implemented and shipped the front-end of Aya Zay multi-seller web app for Aya Bank which let users can buy various kinds of products at Aya Pay application.

10/2022 – 01/2023

Full-stack Developer, Tee Htwin 🌐

- Collaborated with a team of developers and designers to create responsive and user-friendly web applications.
- Implemented front-end frameworks such as React and Nextjs to enhance the user interface and improve overall user experience.
- Utilized server-side programming languages like Node.js and Express.js to build robust and scalable back-end functionality.
- Collaborated closely with team members to understand project requirements, provide feedback, and deliver non-profit projects.
- Kept up-to-date with the latest technologies, industry trends, and best practices through continuous learning and self-improvement.

Projects

06/2023 – present

Kanote API

- The API is built on top of Node.js, a server-side JavaScript runtime, and utilizes Express.js, a flexible and lightweight web application framework, to handle HTTP requests and responses efficiently.
- Artists and buyers can create individual accounts, providing essential information such as name, contact details, and a secure login mechanism.

- The bidding system is a crucial aspect of the API. It enables buyers to place bids on artworks they are interested in, while artists can monitor the bidding process and choose to accept or reject bids.
- The selling functionality allows artists to list their artworks for direct purchase at fixed prices. Buyers can browse the available artworks and make immediate purchases, bypassing the bidding process.
- Exhibition organizers can create and manage events, specifying details such as venue, date, theme, and participating artists. Artists can submit their artworks for exhibition consideration, and the API handles the selection process.

10/2022 – 12/2022

Student Management System

- Web application developed using the React framework, designed to streamline and automate various administrative tasks related to managing students' information within an educational institution.
- A centralized platform for administrators, teachers, and other staff members to efficiently handle student data and perform necessary operations.
- Administrators can create new student profiles by entering relevant details like name, date of birth, address, contact information, and emergency contacts.
- This module allows teachers to input and update students' grades, track their academic progress, and generate report cards. It also provides a gradebook where teachers can manage assignments, record scores, and provide feedback to students.
- It can handle other administrative tasks, such as managing class schedules, organizing extracurricular activities, and handling student admissions and registrations.

Education

Major in mechanical engineering
